#### Description

The KP Performance KPANMOB1001-TM is an omnidirectional antenna with a magnetic NMO mount specifically designed for high-performance applications. Our high-quality antenna can operate at frequencies ranging from 617 to 7125 MHz, which is ideal for indoor low-profile, in-building, and mobile applications. This non-infrastructure antenna has a 5 dBi gain, which transmits high-power signals and faster speed. This vertically polarized omni antenna with NMO mount is available in white color.

The KPANMOB1001-TM in-building antenna from KP Performance features an NMO-type magnetic mount, which is ideal when the portability of the antenna is required. Our magnetic mount comes with a TNC male connector and can be used for WLAN, Wi-Fi, public safety, and mobile RF applications. This NMO antenna mount is constructed with a heavy-duty magnet to ensure secure mounting. No drilling is required for the installation of this antenna mount, making it easy to fine-tune the antenna location. The magnetic base is easy to install and offers a temporary plug-and-play installation.

KP Performance has one of the largest in-stock selection of omnidirectional antennas with same-day shipment. Use our on-line ordering system to purchase your KPANMOB1001-TM antenna 24 hours a day with same-day shipping and no MOQs (minimum order quantities).
